This is an odd stamp. I would guess that it has been *privately* perforated across the bottom, since the narrow margin at the top makes it likely that the bottom margin was originally wide - and someone has manufactured an oddity. The bottom scan is at 200% scale. Note the roughness of the perforation! Possibly a sheet missed the horizontal roulette, and the company applied the perforation.

[the top is imperforate, the bottom is perforated 11, and both sides are fine roulette]

The following *imperforate* copies seem to be using a different control numbers sequence, running into eight digits. There are many in the series, but none of these later usage examples carry any form of dated cancellation. Do they fit into the opening *coarse roulette* control sequence?

--- Late Printings - issued without control numbering - 1965 ---

The catalogue lists these recess printed *control-free* five cigar Series "C" black stamps as follows:

RG-640 - 5 cigars, black, coarse roulette, on vertical mesh wove - used without control numbers
RG-641 - 5 cigars, black, imperforate, on vertical mesh wove - used without control numbers

--- RG-640 - *coarse roulette 6½* - used *without* control numbering ---

Copies of the five cigar Series "C" were issued for use without control numbers. These *late-usage* copies are printed on medium weight crisp wove paper, with a *linear composite* mesh - almost with *modern laid paper* lines, but not nearly as dramatic. It doesn't seem to matter how one holds the stamp - the mesh appears to be *horizontal* when held in one direction, and *vertical* when held in the opposite direction.

★**RG-640** - 5 cigars, black, *coarse roulette*, on *horizontal* mesh linear wove - used *without* control numbering, rollered cancelled 136 by "HavaTampa Cigars", Tampa Florida, Import Licensee # 136.

See BNA "Topics" Volume 66, Number 3, July-September 2009 for similar paper as used on the 1¢ green George V stamps from 1937-38. Where this is termed "ribbed" paper.
